

Air Intake Filter Specification Template

Single Cell Cooling Tower / Evap. Condensor

Company: _____ Contact: _____

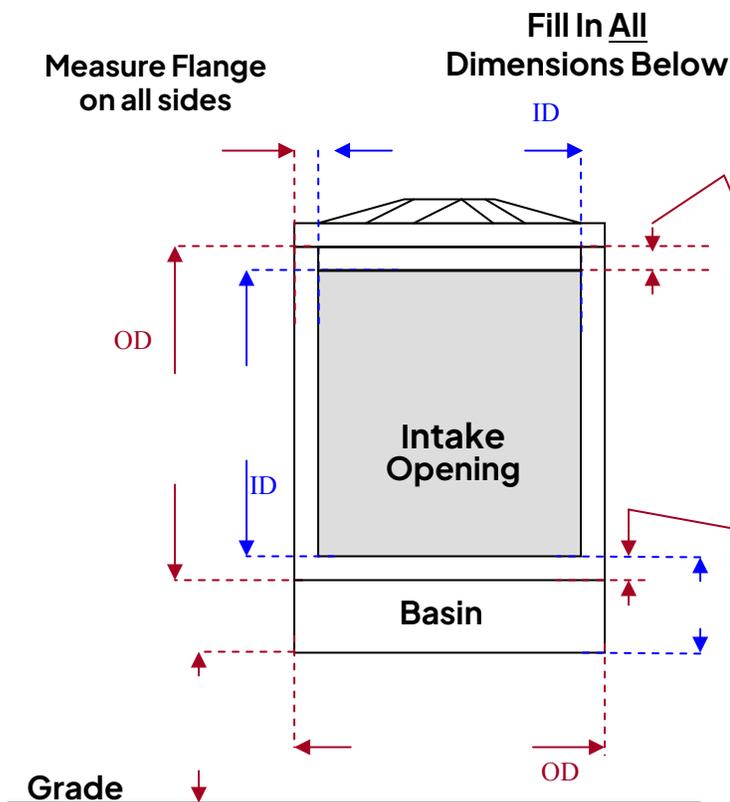

Phone: _____ Cell: _____

Email: _____ End Customer: _____

Equipment (Make & Model) _____

How many intake openings per cell. (e.g., one – face only , two – 1 face & 1 back): _____

PLEASE READ BEFORE TAKING MEASUREMENTS: Please indicate both the inside dimension and outside dimension (including flange) of the air intake opening. When you provide both ID and OD measurements, filters will be sized so center of filter fastening grommets will align with the center point of the available fastening surface. On some cooling towers, flashing may be require across the top behind the filter to create a fastening surface **If you do not provide both ID and OD measurements, then the dimensions will require verification prior to production to ensure a perfect fit.** NOTE: Filter size will vary + / - 1/8”

Indicate Number of Intake Openings to Be Covered

Comments:

Indicate the dimension of the flange running across the top of the basin and across the top of the intake opening - Then indicate the left and right flange dimensions
