Equipment (Model): \_\_\_\_\_

**PLEASE READ BEFORE TAKING MEASUREMENTS:** Please indicate both the *inside* dimension and *outside* dimension (including flange) of the air intake opening. When you provide both ID and OD measurements, filters will be sized so center of filter fastening grommets will align with the center point of the available fastening surface. On some cooling towers, flashing may be require across the top behind the filter to create a fastening surface **If you do not provide both ID and OD measurements, then the dimensions will require verification prior to production to ensure a perfect fit.**

**NOTE: Filter size will vary + / - 1/8"**
